Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Crowle et al.

Crowle et al. shows a collar 12 having an internal surface; attachment means 60, 60a, 60b; valve 206; guide rails 28, 30, 32, 34, 40, 42, 44, 46, 48 and 50 having ends; knobs seen in Figure 4 where the top of 16 engages the rails; actuator 16; passage 100, 102; opening seen in Figure 3; bell-shaped nozzle 102; the angle is seen in Figure 3; and the passage is friction fit onto the valve. Crowle et al. lacks the slot on the actuator, and the tapered portion on the nozzle. It would have been obvious to one of ordinary skill in the art to provide the slot on the actuator in order to more securely lock the actuator into the collar. Further, providing a tapered portion on the nozzle would have been obvious in order to provide a greater range to the spray ejected from the nozzle due to the increase in speed of the material out of the nozzle that would ensue.

Allowable Subject Matter

3. Claims 14-29 are allowed.

The flip cover, (in combination with the other claimed elements), would not have been obvious to combine with the device of Crowle et al. or other related art.

Art Unit: 3754

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Demarest et al., Vlooswijk et al., and Kolanus show other spray devices for aerosols.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Joseph A. Kaufman whose telephone number is (571) 272-4928. The examiner can normally be reached on Monday-Thursday, 5:30AM-2PM.
